University of Central Florida

Bachelor of Science in Information Technology
President's Honor Roll 2025
2013-2015

Valencia College

A.A. in Computer Science

INTERNSHIP

May, 2023 - August, 2023

Amazon Summer Internship

Hands on experience with cloud systems and network operations, learning how to manage scalable infrastructure, monitor system performance and AWS tools

OTHER WORK EXPERIENCE

Production Chef
Olive Garden, 2022-Current

General Manager
Tijuana Flats, 2015-2022

Prep Chef
PDQ, 2013-2015

APPLIED SKILLS & PROJECTS

Full Stack Development
Database & Backend
Frontend & UX
Enterprise Computing

Multi-Client Java GUI with MySQL Integration

Developed a Multi-client java GUI application that connects to a MySQL database using JDBC, enabling users with different roles to execute SQL queries securely. Implemented user authentication, role based access control, and detailed error handling to support a robust client-server architecture.

Network Engineering & Configuration
Enterprise Networking
Network Infrastructure & Security

Network Design & Configuration

Designed and configured a functional network in Cisco Packet Tracer, including routers, switches and end devices across multiple subnets. Implements VLANs, routing protocols, and access control lists to simulate real-world network behavior improve security and traffic management.

Project Mangement
Front End Development
Web Application Functionaity &
Optiomization
Authentication & API Integration

Speed Typing Web Application

Lead a team to build a responsive web-based speed typing game using JavaScript, with features like real-time feedback and performance tracking. Integrated Google Sign-In for secure third-party authentication, and created a batch executablesript for simplified local deployment and testing, gaining hands on full stack development
